SUMMARY

Summary

I'm an M.C.A student at Chandigarh University, skilled in DBMS, IT, Web Development, and UI/UX Design. I love solving computer issues. Currently open to new opportunities and friendly chats!

EDUCATION

| | |
|------|--------------------------------------------------------------------------------|
| 2018 | Class X Boards D.A.V Public School, Asansol 77% |
| 2020 | Class XII Boards India International School, Asansol 59.83% |
| 2023 | B.Sc Computer Science (Hons.) St. Xavier's College, Burdwan 86.7% |
| 2025 | M.C.A Chandigarh University |

PROJECTS

Post-Pandemic Era Touchless 2-layer Biometric Authentication System using ID Card Detection and Face Recognition

This model aims in detecting the real-time face of the personnel and detecting the face that is present in their ID card and then perform Face Comparison (aka. Face Matching) which compares the ID Card face image with the real face image. After successfully getting authorized from the 1st layer of authentication i.e., if a match is found between both faces, then the system proceeds to the 2nd layer of authentication which is Face Recognition of the person's face from a database of authorized faces. If the face of the personnel is recognized from the database, then the authorization is granted, if not then denied.

Music Player

A GUI music player programmed in Python
